

NANDA KISHORE

Backend Software Engineer | Python, FastAPI & PostgreSQL

Hyderabad, India | +91 77298 95468 | nanda.mangunuri@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend software engineer with six years of experience designing and operating production systems across enterprise banking, IoT and AI products. Translates complex requirements into maintainable Python/FastAPI services, REST APIs and PostgreSQL data models, with hands-on ownership of authentication, integrations, observability, cloud deployment and production operations.

TECHNICAL SKILLS

Backend Engineering: Python, FastAPI, Flask, REST API design, asynchronous processing, authentication, authorization and pytest

Architecture & Data: System design, modular architecture, SQLAlchemy, PostgreSQL, database modelling, transactions, JSON/JSONB and migrations

Cloud & Operations: Azure App Service, PostgreSQL Flexible Server, Key Vault, Azure DevOps CI/CD, Bicep, health checks and production operations

Reliability & Integrations: Application Insights, structured telemetry, Azure Communication Services, Azure OpenAI, external APIs, error handling and fallbacks

PROFESSIONAL EXPERIENCE

People Signals Ltd | London, UK

Founding Engineer & Co-Founder | Nov 2024 - Present

Behavioral technology startup developing BERT, an AI-assisted assessment and reporting platform.

- Owned backend system design for BERT, defining modular FastAPI service boundaries, versioned assessment, report, profile and administration APIs, standardized response contracts and PostgreSQL persistence.
- Designed and implemented the security model across OTP authentication, JWT sessions, rate limiting, email-change and deletion workflows, Entra token validation, role-based authorization and audit events.
- Built server-owned assessment workflows with adaptive probe selection, stopping logic, deterministic scoring and report synthesis before Azure OpenAI-assisted narrative rendering.
- Integrated Azure OpenAI, Azure Communication Services and external location and profile APIs with validation, explicit error handling and fallback behavior.
- Owned database evolution through SQLAlchemy models and migration tooling for reports, sharing, feedback, legal content, communication preferences, deletion and administration records.
- Established pytest, telemetry, migration and health-verification controls in Azure DevOps, supporting a cross-platform beta with 27 registered users and 20 completed Blueprints.

Enough Stores Retail Ltd (StokBox) | London, UK

Software Engineer | Mar 2022 - Mar 2024

UK sustainable-retail startup building StokBox, an IoT-enabled dispensing platform.

- Engineered modular Python/Flask APIs for an IoT-enabled dispensing platform and its data-driven customer web interface.
- Integrated backend workflows with embedded hardware components to coordinate product selection, device state and dispensing.
- Implemented first-time setup and repeat dispensing workflows backed by persisted product and configuration data, rapidly learning an unfamiliar IoT stack.

Temenos | Hyderabad, India

Associate Engineer | Jun 2019 - Nov 2020

Global banking-software provider delivering customer-facing, high-reliability digital-banking systems.

- Delivered Java/SOAP integrations supporting enterprise digital-banking journeys.
- Investigated production service and performance defects and contributed across implementation, testing, code review and release readiness.

Associate Trainee | Jun 2018 - Jun 2019

- Developed reusable client components and customized digital-banking workflows.
- Resolved interface and service-integration defects within a cross-functional Agile delivery team.

SELECTED PROJECT

Pension Fund Management Application | Backend-focused personal project

- Designed modular backend APIs and secure data operations for a web application supporting pension-fund records and user workflows.

EDUCATION & CERTIFICATION

MSc Advanced Computer Science with Industry Placement - Distinction | University of Leicester, UK | 2023

B.Tech Computer Science and Engineering - GPA 9.64/10 | B.V. Raju Institute of Technology, India | 2019
