Professional Summary

Software Engineer with over 6 years of experience in building scalable systems. Experienced in designing reliable APIs, improving system performance, and delivering maintainable architectures for data-intensive products. Currently building a stealth AI startup focused on intelligent knowledge systems, LLM workflows, and high-performance API infrastructure. Focused on building resilient systems that scale, reduce latency, and support fast product iteration.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL
Backend: FastAPI, Flask, Django, Node.js, REST APIs, Microservices
AI & Data: LLM, RAG, OpenAI/Azure OpenAI
Frontend: React, Tailwind CSS, Context API
Databases: PostgreSQL, MySQL, SQLite, MongoDB
Cloud & DevOps: Azure, Docker, Kubernetes, CI/CD, Git
Architecture: System Design, Distributed Systems, Async Processing

Professional Experience

Co-Founder & Software Engineer, Stealth AI Startup, London, UK, 11/2024 - Present

- Building an AI-powered knowledge system using LLMs, RAG pipelines, and vector search.
- Developed a scalable backend supporting async workflows and streaming responses.
- Implemented rate limiting, caching, and background task processing for production workloads.
- Architected PostgreSQL and vector indexing pipeline for semantic retrieval.
- Deployed cloud-native infrastructure on Azure with CI/CD and containerization.

WordPress Developer, Sports Therapies Leicester, Leicester, UK, 03/2024 - 04/2024

- Built a WordPress website to deliver a dynamic, high-performance portfolio site.
- Leveraged PHP and WordPress plugins for optimized content management.
- Optimized site performance and SEO, increasing organic traffic by 25% and mobile traffic by 20%.
- Implemented responsive UI patterns and improved UX reliability across devices and browsers.

Software Engineer, Enough Stores, London, UK, 03/2022 - 03/2024

- Designed and built a data-driven, production-ready web application using Python Flask, supporting an IoT system.
- Engineered modular, reusable backend REST APIs, improving maintainability and reducing defect rates by 20%.
- Integrated AJAX-based interactions, reducing system latency by 20% and improving real-time responsiveness.
- Collaborated in Agile sprints, improving development throughput and achieving a 95% sprint completion rate.

Associate Engineer, Temenos, Hyderabad, India, 06/2019 - 11/2020

- Led front-end mobile development for enterprise digital banking applications using JavaScript and Kony APIs.
- Integrated SOAP and Java services into the platform, enabling high-volume financial transactions with reliability.
- Optimised application performance, reducing load times by 30% and increasing user retention by 20%.
- Enforced code review standards, decreasing review cycle time by 40% and improving code quality by 15%.

Associate Trainee, Temenos, Hyderabad, India, 06/2018 - 06/2019

- Developed reusable UI components and custom widgets for digital banking apps using JavaScript and Kony API.
- Improved app stability by resolving 200+ critical bugs, reducing crash rates by 50%.
- Collaborated in a 10-member Agile team, achieving a 98% on-time release rate.

Education

MSc in Advanced Computer Science with Industry Placement, University of Leicester, UK, **Distinction**

B. Tech in Computer Science and Engineering, B.V. Raju Institute of Technology, India, **GPA 9.64**

Certifications

[IBM Full Stack Software Developer](#), IBM, 07/2024

[Application Development using Microservices and Serverless](#), IBM, 07/2024

[Introduction to Containers w/ Docker, Kubernetes & OpenShift](#), IBM, 07/2024

[Django Application Development with SQL and Databases](#), IBM, 07/2024

[Developing AI Applications with Python and Flask](#), IBM, 07/2024

[Python for Data Science, AI & Development](#), IBM, 07/2024

[Developing Back-End Apps with Node.js and Express](#), IBM, 07/2024

[Developing Front-End Apps with React](#), IBM, 07/2024

[Introduction to Cloud Computing](#), IBM, 06/2024

Selected Projects

Pension Fund Management Web Application, [GitHub](#)

Built a full-stack application enabling users to manage pension funds efficiently, featuring secure data operations and modular backend APIs.

Facial Recognition System (OpenCV), [GitHub](#)

Developed a facial recognition system for academic research using Python and OpenCV, including dataset preparation, model training, and inference validation.

Portfolio Website (React + Tailwind), [GitHub](#)

Created a responsive personal portfolio using React, Tailwind, and reusable component architecture to showcase projects and technical experience.

Expense Tracker Application (React), [GitHub](#)

Built a React-based expense tracker using Hooks and Context API for real-time state management and an intuitive user experience.
